STOOLS

OPTIONAL FREE MOTION ELBOW SUPPORT

SIMPLICITY STOOLS

- Broad caster base and five casters to improve stability during position changes.
- Complete mobility to allow movement around the patient's head, minimizing stressful positions.
- Adjustable back support on doctor's stools to facilitate balanced posture (back support is optional on assistant stools).
- Easy height adjustment allowing relaxed positions for multiple operators while maintaining visual access to the oral cavity.
- Operators tilt seat (Generation™ only) promotes proper lumbar curvature and places the pelvis in a more neutral position.
- Assistant's adjustable body support (Generation only) allows comfortable, stable positioning during activities such as suctioning or retraction.

GENERATION STOOLS

430 HIGH-SPEED

- #1 selling fiber optic handpiece in the dental market!
- Ceramic autochuck turbine contains long lasting ceramic bearings and improves effiency while saving time with quick bur changes.
- High quality solid glass rod fiber optics designed to withstand the rigors of steam sterilization.
- Mini head and high torque design improves overall accessibility and visibility.

TITAN® LOW-SPEED

- 100-5,000 or 100-20,000 rpm (depending on motor) speed range capability, requiring only a minimum of attachments to meet a variety of procedural needs provides great system flexibility.
- Motor, straight nose cone, motor-to-angle adaptor, torque multiplier and angles are LubeFree, which reduces maintenance time and the high cost of repeated lubrication.

UTILITY ROOM

- RAMVAC® builds a full spectrum of dental dry vacuum equipment designed for decades of maximum reliability. CustomAir by RAMVAC dental compressors also feature top of the line technology in a LubeFree 100% duty cycle dental compressor.
- CustomAir® produces dental vacuum systems and oil-less dental compressors to operate dental equipment, bringing efficiency to one-person practices or multi-station clinics.
